

## ABSTRACT

A method for the treatment, in particular cosmetic, of an  
area of skin of a human subject transepidermally, by  
5                   spraying a pressurised liquid

The invention concerns a method for the treatment, in  
particular cosmetic, of an area of the skin of a human  
subject transepidermally, comprising the step consisting of  
spraying a pressurised liquid onto the area to be treated,  
10 by means of a spray nozzle (25).

The invention also concerns a device for implementing such a  
method, as well as a hand piece for such a device.
